

Through the pupil questionnaire (sent with this letter) we asked the children about this, the feedback was very clear. You will have already received the pupil questionnaire response for your child's school, but we studied what the children across our Trust family told us.

- They would like more sport and music opportunities and 94% felt that they can learn about lots of different subjects.
- 91% of children know how to stay safe online and 95% feel confident that someone would help them if they were worried.
- A popular request was to have more opportunities to meet and learn with their sister schools - watch this space!
- 97% of our children are proud of their school.

We will be working to bring the children together for meaningful events. They gave us so many suggestions we have a lot to keep us all busy with.

Covid restrictions will look very different in September for you and your child, and each school will share their risk assessments and new routines. We will no longer be working in bubbles, and you will no longer be told when to isolate by the school but by NHS Test and Trace. Please do take a moment to read the information that your child's school provides so that your child feels prepared for September. This will be with you before the end of term.

Finally on behalf of all staff in our Trust family I would like to thank all parents, carers and families for the huge amount of support, kindness and care that you have shown us. Times have been tough, we have had to make last minute changes and even had to tell you to isolate for ten days. You have all adapted to remote learning and despite its challenges we saw huge levels of engagement from the children. You have been amazing – thank you.

Please have a lovely summer after such a challenging year and we look forward to seeing your child back in school in September.

## July 2021 Newsletter

Dear Parents and Families,

Since taking on the role of Trust Lead in April I have aimed to celebrate what your child is able to experience and achieve because we are a charitable School Trust.

As a family of schools, a single organisation, it is our vision to provide your child with an exceptional education by working together to provide the very best teachers and the very best curriculum offer. We want your child to have the skills and experiences that enable them to go onto secondary school and flourish and continue to flourish in adult life because of the excellent start we give them in primary school.

Our staff use the benefits of being a single organisation and work together to develop the best teaching for your child. However, we also want to ensure that your child has better experiences because they can collaborate and learn with pupils in their sister schools.

Tracey Cleverly  
Trust Lead
